had not attended such a meeting here for the last 40 years — Many visits paid to families — most comfortably lodged at Humphey Howland's — interesting circle of friends — some deeply imperiled with the opposition disease — intact & untouched — Have had somewhat to suffer from it — but hope to be rectified — Last evening an excellent public meeting at Aurora — Lodged at Joseph Stokwells. This day a good time in his family concluded Sweet service & suffering — & a ride of 35 miles of rare beauty in parts round the head of Lake Cayuga & by Ithaca has brought us hither. —
To my unexpressible relief I have received good visits by the Liverpool Packet from Bristol — S. G & Mary; but none yet from my children. —

Seneca falls 7mo 16. 3d Day

The wall of opposition at Hector — had been pretty well built up by the Sages 4 generations — & was as well battered down in the course of last fourth day. We had two opens, searching, meetings — morning & afternoon — dined at Obadh W Hamm's drank tea at Joseph Griffin's — a minister —

Yesterday a delightful ride with a company of friends to the falls of the Tolenine a mountain stream which has forced its way thro' wonderous chasms of slate into Cayuga lake — fall 210 feet high.
In the early evening to Ithaca — family in body & much discouraged about myself — but notwithstanding this state of things, and and pouring rain, we held a large meeting — on of the "very best" — Straight mercy — the doctrine of Conversion. We rose at ½ past 4 this morning — & a delightful voyage by Steam boat of 40 miles down the beautiful Cayuga lake, brought us within 3 miles of this large village — where we found ourselves stopped for a public meeting. I am better & my mind quiet & fearful — in remembrance of the remarkable mercies ~~of~~ I experienced at Sages, Hector &c. I have now a succession of 4 towns before me — the work I fear of 4 days — but I must endeavour after patience.

Farmington 7mo 20th 1839.

Asa B. Smith —

I have to record much of honor inwardly but more of divine favour during the last 4 days occupied according to the views stated above. On third day Eve. we
