& Ex Com^e do not wish to pass all power out of their hands over the model farm, its management, expenses &c. I doubt not there will be harmony of feeling & purpose between us, but we feel accountable to the Yearly Mtgs for the working of our Agri Department. We would expect a monthly report of operations & of those expenditures which we supply (and not to give up our supervision) in indirect outlay or loan. We wish to reserve the right at any time to appropriate ground enough out the south end, for Yearly Meeting purposes, in case the Yearly Mtg is removed to Springfield (which please not speak of). All the work of the Yly Mtg may be centralized at this point. We have made two purchases of small tracts adjoining for other purposes which are not included in the Hunt farm.

We do not think we are particular - it will save trouble in the end. You will understand our position about the oversight & direction of the management of the farm when we see any thing to speak of - we do so with I Morris. To simply buy a farm in N.C. & leave it out would succeed badly for us as managers. We have the same end in view & can aid each other. Please write me early. I will be home to day P.M.

Yours Francis T. Kline
