No 1. Scale throughout all the plans 4 ft to 1 inch
The blue represents alone mill. I think 2-6
would answer in 110 C^a for depth of mills below
surface under Parlor & Hall. The air holes
should have iron grating to keep out rats &c.
No 2. Attics of main house to be finished &
plain - ceiled with wood, if cheapest. The joining
rises about 2 ft above the floor of attic - ~~[illegible]~~
so as to give more height of ceiling. These rooms
will make the chambers better & easier entry.
No 3. Parlor open on all sides as a drawing room
it can be closed in winter except on grand
occasions, by making the Living Room, if you
please, a parlor.
The Hall will have a draught through it - it
has a cloak closet under the staircase.
Living Room - a good closet under the staircase
by door to it must finish square on the out-
side. [illegible]
Dining Room - has communication with the
Living Room - Hall - Back Porch & Kitchen - it has
a fine closet. The closet windows are ~~[illegible]~~ for a
4 x 4 closet - reversed them & they will have light
enough from the room windows. A is a closet for
