

1886

Of Gunpowder, for the first time, we have to report, "no school." They have a Monthly Meeting Committee on Education, but their report says, "Those who have children to educate appear satisfied with the public school, which is convenient to their homes, and evince little desire to send their children to schools under the care of members of Society."

Report
of
Educa-
tional
Commit-
tee

tional Of the school in Baltimore Monthly Meeting, the report says that
Committee there has been much improvement since it started in the new location.

Large additions have been made to the apparatus, books of reference, etc., and a kindergarten department has been added.

The complaint that "our schools have been ill supplied with apparatus, books of reference, dictionaries, maps, etc.," has been largely met this year by the efforts of Friends, and the funds supplied by the Yearly Meeting. But few requests of the kind have come forward on the reports this year, and these will be promptly met as opportunity and ability may be afforded.

1886

Statistics of Committee on Education
