weeks, in which time she suffered much bodily pain. Her disorder was an affection of the breast which made verbal communication difficult, yet it was evident that she enjoyed great serenity of mind, expressing an entire resignation to the divine will, whether her disease should terminate in life or in death. - On the 29th of the 3^d month 1821, she departed - ed this life as one falling asleep, in the 22^d year of her age, and was the next day interred in Friends' burying ground, at York.

Mary Willis }

Testimony of Deer Creek Monthly Meeting, concerning our ancient friend Mary Whiffen, deceased.

We think it expedient sometimes to preserve the remembrance of those worthies who have been removed from the field of labour, not only as an acknowledgement due for the benefit of their services, but in order that others might be incited by their instructive examples, to perseverance in the path of dedication. Of this number was our beloved friend above mentioned
