

and recommend a new building with most of the modern comforts & conveniences; this however could not be done without the pecuniary aid & cooperation of their Baller & Phil^d friends.

On motion it was proposed that the plans & ideas of this Com^e be submitted to the Baller Friends. together with what amt. and work the Deer Creek Members obligate themselves to give: provided that the new House be built.

Vote - The new Building to be of the best granite stone for facing. To be hailed from near Rockham, and all the stone of the ~~new~~ old Building to be worked in the new.

The present $\frac{1}{2}$ acre enclosure to be enlarged by the purchase of $\frac{3}{4}$ of an acre more - making $1\frac{1}{4}$ acres in all.

The new Building to be placed in the Centre, & the shed to be removed back of the Building & next the S.E. corner, the additional land purchased giving more room for shade & ornamental Trees

& other purposes.

The above work of hauling & funds subscribed by Deer Creek, if reduced to Dollars & Cents, amounts to

Say \$ 850.00

as follows.

<u>Hauling</u> all material on ground, Stone, Lumber &c <u>gratis</u> - but not to exceed -	\$450.00
about $\frac{3}{4}$ of an acre of Land contiguous	cash. 100.00
Amt. raised in Cash -	300.00
	<u>\$850.00</u>

note. It must be understood that this very liberal contribution from Deer Creek Member is only promised, provided there is a new Building, if only repaired I doubt if $\frac{1}{4}$ the above sum would be contributed.

We enclose a plan drawn by F.L.S. showing how the interior could be arranged with a partition to raise in large public mgs, and to be lowered in Meetings for business.

We do not wish it to influence the Baller Architect & others in their plans, but gives the idea to be improved on.

The Com^e unanimously favored
