

a month on Foreign Missions. The feel gratified at the interest manifested by the Federal Hill members in this work.

Meetings have also been held at Ashton, Hopewell, Deer Creek & Bellefonte. At the last named place a young Friend, has since formed a missionary band among the children, and speaks to them once a month on Foreign Mission subjects.

Our Friends at Black Creek have held two meetings there with good results. In accordance with the suggestion of our last Yearly Meeting, most of the money collected this year, has been sent to the Foreign Mission Com. of Indiana Yearly Mtg. For the aid of Friends Mission in Mexico, and this Com. furnish us, from time to time with reports of the progress of the work. They have also sent us a number of copies of their last annual Report, for distribution amongst our members.

In their report just received, they mention the contribution of \$500 from Baltimore Yearly Mtg. and also "arrangement have been made to furnish them with quarterly reports of the Missions in Mexico, and we have reason to believe they will continue their interest in it. We are extremely gratified by this voluntary act of Baltimore Yearly Meeting". As Indiana Friends have furnished us with 100 copies of their year's report, for distribution amongst our interested members, we do not think

it necessary here to enter into further details.

The Mexican Mission is in a very encouraging condition. There are opening in every direction, for the work of Friends, and we commend it most heartily to the continued interest of our members. The work of our Society at Mt Lebanon has also claimed our attention.

Theophilus Waldmeir wrote to us of a dark, neglected village, where the people had eagerly welcomed his visit, and had held nightly meetings amongst themselves, to read the first New Testament they had ever seen.

Soon they asked for a school, pleading, that "since the world has been created, no school has been opened, as 'Kathorish' and having no funds in hand, that he could apply for this purpose, he called on us to help him. \$150 annually will be required. He sent him \$75 which will support the school for four months, and hope soon to be able to extend further aid.

The work at Mt Lebanon, at present, comprises a "Boys Industrial School", Girls Home, Cottage Hospital, Medical Mission, and Gospel Meetings. Many have been received into membership with Friends, and a regular observance Mtg is held. There are also a number of schools in the neighboring villages, where instruction is given from the Bible, as well as other school books.

Besides this work in Foreign fields, some small contributions have been forwarded for missionary work
