

Baltimore 12th 1866-Jas. Moore
Dear Friend

In answer to thy letter of 8th inst in
 would say - do not hesitate to give us thy views &
 suggestions upon all matters connected with the
 work. We shall have to rely upon Wm Scott & myself
 for information, & we need your suggestions & help ours.
 We shall like a system of education in N. C. in the
 lines - we would rather not ^{at first} force the work beyond
 what is ^{necessary} to meet the needs of the children.
 We fear there is a main to be a teacher, when we
 hear of 8 in one No. 10. We hope you will con-
 tribute your efforts as much as possible. Take
 care to get the "hang" of things among these poor
 people who are strangers to you - survey the ground
 & talk in all the surroundings, & you will be
 able to do so fully to build up your
 work. We must not repeat the enthusiasm of
 parents & children upon 4 years of ^{unstable} education
 but do not hesitate to advise & direct them.
 Among them a few good laborers in a
 Christian Nation than continue their many
 weak ones. Show us what schools not your
 case, to which friends cluster so - incidentally
 look after them - advise with the teachers if kind
 with the parents of the children.
 We hope these hearts will be turned,
 & they thy & us
 thy friend - J. S.
