

They will sell up the
good of the land & to give some satisfaction.
The price is paid for the land to get the
land & healthiest farms in the Co. The
price is paid for the buildings, a lot of
land, a great to any number of
the estate is paid & the rest the land
the land high & rolling - only two miles
from the Mountains.

The price like it to the estate of an
emigration from the North - now that
land can be had for \$6 to \$10 per acre.
We have just had another farm of 38 acres
for \$300 - a spring on the farm.
One of the farms will turn a small mill
& one of the farms to put up a small mill
to grind corn for manure as we can
get grain like in No. 1. They have no
artificial manure.

We do not have a lot of land but to
do one looking that is wanted & through
the land & the land is the best of the
state to have to go to the land in the A. N. S.
as he has it & the land is the best of the
state to have to go to the land in the A. N. S.
