

I suppose to give them money, as for our
 account, at least - then the mill
 cost we can raise some money
 to run it - to the at small rent -
 if it is profitable enough to make it
 to give to them, we can set the rent
 must have for \$300 - then there is profit
 on it - cost of steam has become a mill
 tonight. The same stone will sell for
 \$50 there, add. It is \$45 here - say
 \$100 there. They all tell me we must
 have the cost of the stone now
 it is if we pay \$20 - we must
 sell at \$40 to pay - which is the
 profit & result. I have the "heads"
 in it - the side very interesting
 broken. That has a year - would pay for
 the side is less than a year. I must
 in connection, in money, back, & then
 can run it on the account on long
 as there runs the same as the machine
 to say that for the same at cost. \$100
 to go to the side tonight & will see
 about him & others. I have not had
 the letter yet - Number the 6 and
 the 7 and 8.
