I will ask Jas. Moore to state more fully what the prospect for Guilford College is; although I suppose that is not yet history.

But it might be well to show the Buildings over that name.

I will make some further investigations as to the Reports of the Educational Committee appointed by the Y. M.

In the meantime I thought it best to send the two manuscripts mentioned, as they together give a pretty good history of this School, which has been the center of Friends' work in education.

Truly thy friend,
L. Lyndon Hobbs.
